

## **PRESCRIPTION FOR INITIAL SUPPLY OF S/C ANTICIPATORY MEDICINES FOR THE PALLIATIVE CARE OF SUSPECTED OR CONFIRMED COVID-19 PATIENTS IN THE SWL COMMUNITY**

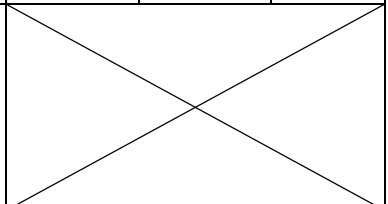

This prescription is intended for the initial supply of S/C anticipatory medicines for the palliative care of suspected or confirmed COVID-19 patients within SWL, and must be completed by a community prescriber.

- A copy of the prescription and Medication Administration Record (MAR) chart is to be emailed to the provider pharmacy hub in advance (with the name of the collecting person) to allow for the prescription to be prepared before collection. Please email the prescription and MAR chart from an [nhs.net](https://www.nhs.net) account to the provider pharmacy hub – contact details provided in the COVID 19: Supply of Anticipatory End of Life Care (EOLC) medicines within SWL Pathway.
- The original prescription will be given to the provider pharmacy hub in exchange for the supply of medicines.
- Once supplied, pharmacy hub to file and keep original prescription as per local procedures.
- Please ensure person collecting medication shows ID on collection, in line with local procedures.
- This prescription is to be used in line with the COVID 19: Supply of Anticipatory End of Life Care (EOLC) medicines within SWL Pathway. The guideline recognises that S/C use is off-label but standard practice in palliative care.
